

Job Title: Android Developer - TAK Development

Company: Kwesst Microsystems

Location: Kanata Ontario

Job Type: Full-time – On Site

About Us:

Kwesst is a dynamic and innovative software development company committed to creating cutting-edge solutions that make a positive impact on the world. We are currently seeking talented and experienced Android Developers to join our growing TAK (Tactical Assault Kit/Team Awareness Kit) development team. If you are passionate about mobile technology, enjoy solving complex problems, and thrive in a collaborative environment, we want to hear from you!

Position Overview:

As an Android Developer for TAK development, you will play a crucial role in designing, developing, and maintaining mobile applications that support the Tactical Assault Kit/Team Awareness Kit framework. TAK is a mission-critical tool used by military and public safety organizations for real-time situational awareness and communication.

Responsibilities:

Collaborate with cross-functional teams, including software engineers, UX/UI designers, and product managers, to develop robust and scalable Android applications for the TAK framework.

Implement new features and enhancements, ensuring high performance, responsiveness, and a seamless user experience.

Work closely with the QA team to conduct thorough testing, identify and fix bugs, and optimize application performance.

Stay up to date with the latest trends and best practices in Android development, and actively contribute to the continuous improvement of our development processes.

Participate in code reviews to maintain code quality and ensure adherence to coding standards.

Collaborate with other developers to integrate TAK applications with backend services and external APIs.

Qualifications:

Bachelor's degree in computer science, Software Engineering, or a related field.

Proven experience developing Android applications, with a strong portfolio of past projects.

Proficiency in Java and/or Kotlin programming languages.

Experience with Android Studio, Git, and other relevant tools.

Knowledge of RESTful APIs and integration with backend services.

Familiarity with TAK or similar mission-critical applications is a plus.

Strong problem-solving skills and attention to detail.

Excellent communication and collaboration skills.

How to Apply:

If you are excited about the opportunity to contribute to the development of mission-critical Android applications for TAK, please submit your resume, cover letter, and a link to your portfolio or GitHub repository.

Kwesst is an equal opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all employees.

We look forward to reviewing your application and exploring the possibility of welcoming you to our talented team at Kwesst.
